

Standard ECMA-275

Measurement of structure-borne vibration induced by small air moving devices (AMDs)

(June 1998)

This Standard covers vibration levels from small air moving devices (AMDs) with mounting footprints of less than 0,48 m x 0,90 m for the full size test plenum and less than 0.18 m x 0,3 m for the half size.

It covers all types of AMDs which can be mounted on, and are self-supported at, the discharge or inlet plane of a test plenum box as specified in ISO 10302. Some guidance is given for non-self-supporting AMDs.

The following files are provided in this set of CD-ROMs:

File name	Size (Bytes)	Content
ECMA-275.PDF	148'761	Acrobat PDF file
ECMA-275.PSC	2'166'114	Corresponding PostScript file

Printed copies of this Standard can be ordered, free of charge, from documents@ecma.ch.
