

ECMA TR/66

Mapping of PCTE to the ECMA/NIST Frameworks Reference Model

(June 1994)

This Technical Report provides a mapping of the PCTE, Standard **ECMA-149** relative to the Reference Model (RM) for Frameworks of Software Engineering Environments.

A mapping of PCTE should include a description of the SEE components defined in PCTE using the common reference terms and structures provided by the RM. In this way it will provide a basis for comparing components of PCTE with other SEE components and related standards.

The mapping consists of a section for each of the services described in the RM which are covered by PCTE. The main part of this document is structured in a way corresponding to the RM in order to facilitate comparisons and references to either other mappings, or with the RM document itself.

The following files are provided in this set of CD-ROMs:

File name	Size (Bytes)	Content
TR-066.PDF	23'181'008	Acrobat PDF file
TR-066.PSC	22'563'742	Corresponding PostScript file
