

Standard ECMA-265

B-PISN - Inter-Exchange Signalling Protocol - Signalling ATM Adaptation Layer (B-QSIG-SAAL)

(September 1997)

This Standard specifies the signalling ATM adaptation layer (SAAL) protocol used at the interface between Broadband PINXs and between Broadband PISNs within the framework of the B-QSIG signalling system protocol family. The B-QSIG SAAL uses the functions provided by the ATM layer, and provides the services required by the B-QSIG Layer 3 signalling protocols.

The following files are provided in this set of CD-ROMs:

File name	Size (Bytes)	Content
ECMA-265.PDF	91'789	Acrobat PDF file
ECMA-265.PSC	427'862	Corresponding PostScript file

Printed copies of this Standard can be ordered, free of charge, from documents@ecma.ch.
