TC12 - Product safety

Scope:

To consider national and international safety regulations with a view to establishing appropriate safety standards for information technology equipment so that they are intrinsically safe and safe for operating and maintenance personnel.

Programme of work:

1. To survey existing national and international standards and recommendation concerned with safety requirements.

2. To study the safety requirements associated with power control and distribution and establish recommendations where appropriate.

3. To consider short circuit and overcurrent protection, earthing, voltage exposure limits, mechanical design, etc., and establish recommendations where appropriate.

4. To assume responsibility for the maintenance of ECMA Standards prepared by TC 12.

5. To establish and maintain liaison with other standards organizations in order to present ECMA proposals to them and to make comments on their proposals.

Chairman:	Vice-Chairman:	Secretary:
Mr. H.B.B. van Dam (Philips)	Mr. V. Gasse (IBM)	Mr. L. Lauri (ECMA)

Active Companies:

The following companies, members of ECMA, have nominated representatives to TC12:

   Alcatel, Cisco, Compaq, Dell, Eastman Kodak, EMC/Data General, Ericsson, Fujitsu/ICL, HP, IBM, Intel, Lucent, Nokia, NCR, Philips, Siemens, Sun, Tenovis, Xerox.

Representatives of EACEM are attending the meetings and participating actively to the work.
