TC36 - IT security

Scope:

- To research and develop standards, methodologies, and guidelines that promote appropriate IT security practices which enable the expansion of the IT market. Such development may include expert contributions to other committees and organizations.

- To promote the acceptance and usage of these standards.

- To research and further the development of a Registry of commercial and government Protection Profiles in support of the International Common Criteria for evaluating IT security products.

Programme of work:

1. To verify, update and promote the acceptance and usage of COFC and E-COFC network-based IT standards.

2. To work with U.S. NIST and other standards organizations on the development of Protection Profiles for the COFC and E-COFC.

3. To investigate the feasibility of creating an ECMA-based Registry of Commercial Protection Profiles by researching the need for such Protection Profiles (PP) and such a registry.

4. To work with ISO/IEC JTC 1/SC27/ WG3 and the CCIB on determining the requirements of PP registration procedures and on developing those procedures.

5. To provide advice, support, and guidance for other ECMA groups in IT security matters.

6. To provide liaison with ISO/IEC JTC 1/SC27, the CCIB, OECD, and ETSI.

7. To assume responsibility for the maintenance of ECMA Standards and Technical Reports prepared by TC36.

Chairman: **Vice-Chairman:**   Secretary:
   Vacant   Mrs. S. Malmborg (Ericsson)   Mr. L. Lauri (ECMA)

The following companies, members of ECMA, have nominated representatives to TC36:

Compaq, Ericsson, Fujitsu/ICL, HP, IBM, ISLinkup, Mitsubishi, NCR, Siemens.
