ECMA TR/80

Migrating to CSTA Phase III

(June 2000)

The purpose of this Technical Report is to aid the transition to CSTA Phase III by those who are already familiar with Phases I and II.

Phase III of **CSTA** extends the previous Phase II Standard in major theme directions as well as numerous details. Major areas of advancement include:

- New categories of services and events.

- Additional services and events for call and device control.

- Enhancement to existing services and events.

- Organisation of services and events to reflect a grouping based on function (call control, device control, etc.)

- Use of a consistent template for services and events that includes initial/final Connection State, connection state transitions, event monitoring sequences, etc.

The following files are provided in this set of CD-ROMs:

File name	Size (Bytes)	Content
TR-080.PDF	170'214	Acrobat PDF file
TR-080.PSC	1'363'177	Corresponding PostScript file

Printed copies of this technical report can be ordered, free of charge, from documents@ecma.ch.
