Standard ECMA-245

PISN - Inter-Exchange Signalling Protocol - PINX Clock Synchronization (SYNC-SIG)

2nd edition (September 1997)

This Standard specifies the signalling protocol for the support of clock synchronization (SYNC-SIG) between Private Integrated Services Network Exchanges (PINXs) connected together within a Private Integrated Services Network (PISN).

This protocol supports the synchronization of a PISN using the different sources of clocks available to each PINX. The protocol is based on the method of synchronization described in annex F of the International Standard ISO/IEC 11573.

This Standard is applicable to PINXs which can be interconnected to form a PISN.

The following files are provided in this set of CD-ROMs:

File name	Size (Bytes)	Content
ECMA-245.PDF	873'910	Corresponding Acrobat PDF file
ECMA-245.PSC	2'184'512	Corresponding PostScript file
